

Our family values greatly the protection from intrusive marketing calls availed by our Wisconsin no-call law. Dinners, conversations, and other home-based activities are no longer ceaselessly interrupted by fruitless telemarketing contacts. We DO NOT reward telephone solicitation with our business!

Regarding proposed FCC changes to our current Wisconsin no-call law, we are entirely opposed: Just because we've had contact with a business does not mean we should have to be exposed to further unwanted telemarketing from that businesses or its affiliates!

According to recent headlines in the Wisconsin State Journal, telemarketing ranks first in consumer complaints in Wisconsin. Some 80 percent of Wisconsin's population (those on our no-call list) would appear to agree with us that telemarketing is counter to our family's value of our at-home time together and our privacy.

Yhank you for your consideration of this comment.
